

# Where is your psyche?

*by Dena*

Everyone has one  
We are told  
It's our inner better self  
Unique to humans  
A spirit...

so

If animals had one  
We'd be surprised  
We humans are the onlys  
Right?

or so we have believed

but

On Friday the 13th the cosmos got  
a special Psyche  
So now it is not just a people thing  
Humans watched it become  
UNIVERSAL  
The spirit, our Psyche,  
Is out there now

Our hope for this Psyche is  
Exploring  
Knowledge  
Sharing  
Helpfulness  
Answers

For mankind,  
Us humans!
